## Legionella Industrial Test Kit

The World's Fastest *Legionella* Test

*Legionella* is the causative agent of Legionnaire's disease, a potentially fatal form of pneumonia. Guidelines exist across the world for the control of *Legionella*.

In 2002, the Health and Safety Executive released guidelines for the control of *Legionella*, known as the L8 guidelines. These guidelines detail the key parameters that should be tested on a weekly and monthly basis to minimise the risk of *Legionella* proliferating to harmful levels in open water system.

The Lovibond® *Legionella* "L8" Test Kits contain the recommended tests for both weekly and monthly monitoring.

- Fast, easy and accurate
- Results in as little as 30 minutes!
- Confirms performance of *Legionella* prevention and treatment protocols
- Test Kits available for detecting both waterborne and biofilm *Legionella*

Part Number: 56B006101

### Legionella Industrial Test Kit

The *Legionella* System Test Kit is for detecting *Legionella* in a water sample — it is ideal for on-line and a variety of industrial applications.

This test procedure utilizes hollow fiber filtration modules which attach directly to the provided sample point fittings (both a 1/2" and 3/4" female threaded fittings are provided). The filtered sample increases the sensitivity of the test.

This filtration step requires no pumping — just connect the sample point fitting to the water system (such as a shower head or on-line sample point) and use the system pressure to drive the filtration. The pre-filled syringes contain the required recovery buffer, so there is no need to measure or dilute solutions.

With results in 30-35 minutes (including sample prep-time), the test allows for immediate understanding and response to the water system conditions. Regular use will increase confidence in your *Legionella* control procedures and reduce risk of outbreaks and litigation!

#### Limit of Detection

100 CFU/l

#### No. of Tests

5

# Delivery Scope

- 5 Test Strips with Dispensing Pipettes
- 5 Syringes with Recovery Buffer
- Sample Collection Jar
- 5 single-use filters
- Female threaded sample point fitting
- Instruction Manual
- Carrying Case
