Tintometer® Group

Legionella Risk Assessment Test Kit

The World's Fastest *Legionella* Test

- Fast, easy and accurate
- Results in as little as 25 minutes!
- Confirms performance of *Legionella* prevention and treatment protocols
- Test Kits available for detecting both waterborne and biofilm *Legionella*

Part Number: 56B006501

Legionella is the causative agent of Legionnaire's disease, a potentially fatal form of pneumonia. Guidelines exist across the world for the control of *Legionella*.

In 2002, the Health and Safety Executive released guidelines for the control of *Legionella*, known as the L8 guidelines. These guidelines detail the key parameters that should be tested on a weekly and monthly basis to minimise the risk of *Legionella* proliferating to harmful levels in open water system.

The Lovibond® *Legionella* "L8" Test Kits contain the recommended tests for both weekly and monthly monitoring.

Legionella Risk Assessment Test Kit

The Enterprise Test Kit offers users a combination of the Swab Test Kit and the System Test Kit.

This version of our test kits is ideal for first time users trying to determine which procedure best fits their processes, or for low-volume users that require both swab and filtration type tests.

With results in as little as 25 minutes, the test allows for immediate understanding and response to the water conditions. Regular use will increase confidence in your *Legionella* control procedures and reduce risk of outbreaks and litigation!

Kit supplies everything required for 4 tests (2x swab test and 2x filtration test).

Limit of Detection

100 CFU/l & 200 CFU/l / Swabbed area

No. of Tests

4

Delivery Scope

- 4 Test Strips with Dispensing Pipettes
- Recovery Buffer
- 2 swabs
- 2 single-use filters
- 2 x 60 ml syringes
- 2 reaction tubes with Recovery Buffer
- Instruction Manual
- Carrying Case
