

# Lovibond® Colour Measurement Tintometer® Group

## EBC Comparator (AF607)

EBC Scale, 3-Field Visual Measurement

- Compact, Visual Measurement System for Single Scale Measurements
- Self-Contained, Includes Everything Needed to Measure the Scale
- Easy-To-Use, Fast & Accurate
- 3-Field Viewing for Optimum Accuracy

Part Number: 345000

### Enables Compliance to the EBC Color Scale

Designed to measure EBC color standards that cover the range 2 -10 in steps of 0.5 EBC and 10 - 27 in steps of 1 EBC. The discs are arranged in two pairs so you can easily change them over.

### Fast Determination of Color Value

You can directly compare the sample with the color values for quick results.

### Easy to Achieve Optimum Color Accuracy

The advantage of a 3-section field of view is that the sample and two consecutive glasses on the color scale are viewed simultaneously, making it easier and quicker for you to achieve the ideal color match.

### Facilitates Tolerance Level Setting

For rapid color grading within predetermined color limits, the glass standards can be set to the two limiting colors so that it is easy to check that the sample is within tolerance.

### Guaranteed Constant Lighting Conditions

In the instruments, the tungsten halogen light source is color corrected to CIE standard illuminant B, which guarantees constant lighting conditions for color grading.

### Compliance to Standards

Each Comparator 3000 is supplied with the correct cells for the appropriate path length determined by the standard.
